

Join the BIS in space!

The BIS is planning to fly its first spacecraft in space and you can help make it happen

We've teamed up with KickSat.org to put a small fleet of Sprite ChipSats into Low Earth Orbit, but can only do it if we can find 100 or more space pioneers willing to donate \$300 or more to sponsor a spacecraft they can call their own before the 2nd December 2011

The Sprite is an open source spacecraft the size of a couple of postage stamps that we plan to deploy from a CubeSat called KickSat to flight test this exciting new space exploration system

Visit KickSat.org to find out more and help us travel from imagination to reality - today!
